

# LATEST UPDATES

OCTOBER 2023

## NEW MODELS:

Washtech are pleased to confirm that the new **Starline XU, XV and XV 10Amp** are ready for introduction and will be available for sale as soon as the older models sell out.

These join the **XG, XP, and XL** introduced earlier this year and provide our mutual customers with even better value for their money through:

- The performance and reliability of the old models is retained with the new models featuring the same high quality and powerful wash pumps, adjustable controls, and heavy-duty construction methods; PLUS,
- We have added enhanced features such as the lower sump with stainless steel scrap basket (so hands free drainage – no upstand), along with new split wash and rinse arms in the XU and XV for improved wash and rinse results along with easier use.

**New XU Arms and Sump with SS Filter**

**Old XU Arms and Raised Plastic Filtration**

### Additional Details:

- The XV dimensions have been trimmed to make this a truly compact dishwasher with the width down to 500mm and height to 780mm. The unit remains suitable for use with 435 and 450mm racks and has a slightly lower door clearance of 310mm (which is still more than the current GM).
- Available upgrade kits include rinse booster pump for sites with low pressure, retrofittable stainless-steel arms, and a riser base for the XV to increase the height to 840mm.
- No change to the current RRP's for the XU (\$4,850), XV (\$4,770) and XV 10Amp (\$4,770).
- Order codes for the new models are:  
XU = SXU0040,  
XV = SXV0040, and  
XV 10Amp = SXV0043.

## FULL X-TYPE LINE UP:
