

ELECTRIC SOUP WARMER WITH LADLE

Sunnex Soup Warmer is stylishly designed for easy-to-use, safety, and efficiency. This appliance is of excellent quality and construction. It keeps the food consistently at the serving temperature. Besides, it is equipped with an overheated thermostat for safety. It is suitable for wet heat operation only. We recommend that the soup warmer is plugged into a socket that has no other appliance connected to it and always operate with a lid in place. The food item must be heated prior to using the soup warmer. The warmer is designed to keep food warm, not for cooking. A small amount of water is required between the inner and outer liner in order to operate. Keep the soup warmer empty when not in use.
