

QUEEN LINE

QT670 (AUTOMATIC)

The watchwords for this machine are: simplicity, productivity and reliability. Thanks to the 7" touch screen it is possible to set up to 100 different programs, to choose whether to start working from the right or left table and to set the speed of the belts and cylinders up to 60 m/min. All of it in a simple and intuitive way: it only takes a touch on the clear color display! In addition to this, strong and large cylinders together with a reinforced structure, ensure a high daily productivity and an absolute reliability. Automatic belts inversion system, foldable and removable tables and stainless steel protection grid, can further well describe the strong nature of this sheeter. Moreover the new up-and-down cylinders' moving system, operated by oil bath screws, allows the user to achieve very thin thicknesses without any difficulty, even in case of hard dough.
