

Kitchen Pro Quat Sanitiser

A combination of innovative packaging and powerful chemistry delivers unsurpassed results, retaining the highest level of quality.

An innovative combination of fifth generation quaternary ammonium, formulated to deliver high level sanitation on all food contact surfaces in kitchen and food processing facilities. Its spill-free packaging enhances staff safety and avoids potential contamination of the product.

360 of Protection™
with cleanliness,
staff safety &
kitchen efficiency

Reduce cross
contamination
& food-bourne
illness risk

Quaternary
ammonium sanitiser

Rinse-Free

Effective & safe
on food-contact
surfaces

Effective against
e-Coli, Listeria,
Salmaonella &
other bacteria

Kills 99.999% of
germs

Accurate dispensing
for consistent results

CLEANER. SAFER. HEALTHIER

ECOLAB®

Kitchen Pro Quat Sanitiser

Use Instructions

Kitchen Pro Quat Sanitiser is suitable for spray or soak sanitation of clean equipment, floors and walls in food service environments.

1. When used at up to 1% (up to 400 ppm) Kitchen Pro Quat Sanitiser is suitable for use as a "no rinse" sanitiser on hard non-porous food contact surfaces provided they are thoroughly dried.
2. When Kitchen Pro Quat Sanitiser is used at higher concentration, food contact surfaces must be rinsed with potable water.
3. Before sanitising with Kitchen Pro Quat Sanitiser ensure all equipment is cleaned using a recommended Ecolab detergent, then rinse all surfaces thoroughly.
4. Spray or soak all cleaned surfaces with 200 ppm active quaternary (0.5% Kitchen Pro Quat Sanitiser). Required contact time is a minimum of one minute.

Your Ecolab representative will set the dilution to provide optimum results according to your water pressure and surface type.

Safety Information

Not intended for use on medical devices. Discard solution within 24 hours or at the end of the shift. Consult your Ecolab Specialist for specific use directions and SDS.
