Speed up bar service
Mix, foam and aerate cocktails!

DID YOU KNOW?

By 1911, the Hamilton Beach Manufacturing Company had officially been formed. One of the very first products - the drink mixer - used a small, high-powered motor to rotate a spindle at high speed. Soon after, the innovative engineering minds of Hamilton and Beach were able to adapt the drink mixer's motor technology to a mountable, tabletop, all-purpose motor. The same type of spindle drink mixer invented in 1911 is still in use today in homes and businesses throughout the world.

maestro

Pepper and Salt Mills with Ceramic Grinding Mechanism

- Ceramic grinders for use with salt or pepper
- Additional knob for interchangeable "S" or "P"
- 115mm high

WHY CERAMIC?

Whilst salt is generally not a very hard substance, it is very corrosive. Over time salt will corrode most metals, including stainless steel. Ceramic grinders are corrosion free and hard wearing.

Turbofan Convection Oven systems are more than just a normal oven - cook, roast, bake and even steam. There is an oven in our range to suit any baker or chef - guaranteed.

BAKE

Turbofan's bi-directional reversing fan system ensures evenness of cooking within the chamber and across the tray, baking evenly all day, every day.

ROAST & COOK

With multi-stage cooking, the oven seals in moisture and perfectly colours and browns meals.

REGENERATE

With moisture control, even the most difficult of dishes can be kept from drying out during the regeneration process and the final product maintains its vital nutrients.
