

FOODSERVICE DESIGN

Many operators struggle with designing their commercial kitchens, especially when it comes to space optimisation and layout. Using a 3D software such as Revit gives a clear and realistic picture of how your kitchen will look and function. You can also make changes and adjustments easily before finalising your design.

OPTIMISED WORKFLOW

SPACE PLANNING

EQUIPMENT

We work with you to bring your vision to life with professional 3D renders and VR walkthroughs to help you plan your commercial space.

SKOPE[®] TRULY GREEN

Why use natural refrigerants?

- No toxicity • No ozone-depleting potential • Virtually zero impact on global warming
- Industries are phasing out man-made refrigerants as part of the Kigali Amendment to the Montreal Global Warming Protocol
- Increasing price of servicing

ReFlex Solid Door Fridges and Freezers

Designed for foodservice businesses looking to maximise every dollar. ReFlex combines cutting edge power savings and time saving advantages of the SKOPE-connect™ app with traditional SKOPE toughness and temperature consistency.

- R290 natural refrigerant • 304 stainless steel
- Monitor and control with the SKOPE-connect™ app
- Self-closing, double glazed and Argon filled doors

Electric
Journey!

Induction Frypans

The Agnelli induction frypans have a "Welded/brazed" induction disc versus a "Pressed" base. Why is a "Welded/Brazed" base higher in performance?

- Pressed induction bases leave some space that lets liquid enter between the two materials that affect the strength when powered by an induction appliance.
- The pressed base also has empty areas which affects the quality of even heat distribution.
- The welded/brazed bases allow a higher heat performance compared with a pressed base, absorbing more power and an increase in the heating speed which reduces energy consumption in the induction cooktop.

Did you know?
If your pan and burner size has a 2 inch difference, it could waste as much as 40% of heat!

kitchen ventilation system

LOW VELOCITY • ENERGY SAVING DESIGN
REDUCED FIRE RISK • SUPERIOR PERFORMANCE

Proudly manufactured in New Zealand.

Features & Benefits

- Energy saving with lower extract volumes
- Spot cooling for improved operator comfort
- Reduced maintenance required for ductwork
- Reduced fire risk
- Stainless steel baffle filters, UL listed
- IP65 rated LED down lights
- Designed and manufactured in New Zealand
- Great aesthetic design
- UV filtration available
- Reduces required install time on site
- Quotations and drawings all prepared in New Zealand
- Latest induction technology, improving capture & containment

Did you know?

For every 15 seconds spent washing hands, 10 times more bacteria is removed.

Damp hands are 1,000 times more likely to spread bacteria than dry hands.

Most bacteria on our hands is on the fingertips and under the nails.

Critical times for hand washing are before preparing foods and after going to the bathroom.
