Are you pouring your profits down the drain?

Once you get liquor in this tube, the alcohol evaporates & leaves the sugar which over time blocks the tube.

Ball bearing 3 seals the tube immediately after the shot is poured. 3 balls are better than 2!

Microfibre Cloths

- Microfibre works by attracting dust and other contaminants like a magnet and trapping them within its very fine microscopic filaments
- For a streak-free, lint-free, scratch-free finish and polish
- These ultra soft microfibre towels will lift and trap dirt and moisture, leaving a clean, dry and polished surface
- Can be washed and reused hundreds of times
