HLT25 Electric Chafer Water Bath, 1/1GN

ACCOLADE

On-Counter Roll Top Chafers

BN1 1/1 GN Rectangular, 530 x 325 x 65mm

- Heavy quality mirror finish stainless steel
- Non crash mechanism
- Best design, quality and features to enhance any buffet table presentation
- Features a clutch system which prevents the lid from falling forward or back
- Lip around inside edge of the lid collects condensation and returns it to the water bath, which stays full and prevents water pooling on the counter
- Designed for electric, gel or wick fuel heating

INDUCTION CHAFING

INDUCTION CHAFER SYSTEMS

Our induction hobs can be used on-counter or available in-built into a buffet table.

Our Induction Chafers have the option of a glass or solid lid. Porcelain inserts are also offered to enhance the presentation.

THE POWER OF INDUCTION

How Induction Cooking Works:

1. The element's electronics power a coil that produces a high-frequency electromagnetic field.
2. The field penetrates the metal of the ferrous (magnetic-material) cooking vessel and sets up a circulating electric current, which generates heat.
3. The heat generated in the cooking vessel is transferred to the vessel's contents.
4. Nothing outside the vessel is affected by the field—as soon as the vessel is removed from the element, or the element turned off, heat generation stops.

Induc'Stone is an invisible induction unit.

Place under different stones such as granite, marble, natural stones, and sometimes mixed stones; Induc'Stone will set a perfect buffet counter. Paired with an induction friendly chafing dish, simply placed on top of the counter, Induc'Stone creates the most simplistic, minimalist, & chic buffet counter.

Induc'Stone is affordable, easy to install, and user friendly for both the staff and the customers.

Can use up to 1/1 GN pans with the flexible silicone spacer.
