

# Southern Hospitality Furniture

Southern Hospitality wants you to enjoy your new furniture, following the suggestions below will help to ensure that you gain maximum value from your furniture for years to come ....

## Chrome, anodised, polished or powder coated metal finishes and surfaces

These should be washed with a soft cloth or sponge dipped in lukewarm water, and then thoroughly dried with a clean lint free cloth. A well diluted neutral detergent may be added if required, however strong, undiluted detergents must be avoided as they contain bleach and acid. Scouring creams or metal scouring pads should not be used as they will leave scratches and abrasions.

## Stainless steel

Is a high-maintenance surface which requires constant care to preserve its appearance. Wash with a non-abrasive cleanser or a spray specifically designed for stainless steel surfaces. Despite the best of care, a phenomenon known as "tea staining"—a brownish discolouration—may occur over time, especially in coastal areas or regions where there is a high concentration of chlorides in the water. Although it does not impinge on the structural integrity or longevity of stainless steel, tea staining can be unsightly. Daily thorough drying of the surface preventing moisture being trapped under dust or sea spray will reduce tea staining significantly. There are also commercial applications available that have proven successful in removing tea staining such an INOX-clean.

## Marble and granite surfaces

In line with the manufacturer's specifications, marble and granite surfaces should firstly be washed with a neutral (ph7) detergent diluted in water. Secondly rinse thoroughly with clean tap water and buff dry with a clean dry lint free cloth.

## Wood, polypropylene, polyethylene and polyurethane

Use a soft cloth dipped in lukewarm water to gently remove soiling then wipe completely dry with a soft dry, lint free cloth. As with chrome surfaces only a weak detergent solution should be used, if at all. To avoid scratching, any abrasive cleaning agents must not be used.

## Laminated surfaces

Use a soft cloth dipped in lukewarm water to gently remove soiling then buff completely dry with a soft dry lint free cloth. As with wood surfaces only a weak detergent solution should be used, if at all. To avoid scratching, any abrasive cleaning agents must not be used.

## Fabric

Individual manufacturers cleaning and maintenance recommendations should be closely adhered to for optimum upkeep and preservation of fabric finish. Commercial anti-stain applications such as Fibre-guard 2000 or Scotch-guard should be considered in high use applications to assist in repelling liquids and stains.

## Stacking furniture

Whilst stacking furniture is designed to stack one on top of the other, most damage occurs to these products due to "vigorous stacking" or a "lack of care" when stacking. To maximize the life expectancy of your stacking furniture ensure that proper care is taken when stacking and un-stacking these items. This will enable you to gain maximum value from your furniture by prolonging its usable life.

# Custom Table Tops

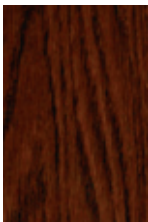

We have a wide range of materials and colour options available to match your environmental aesthetics. With premium solid wood table tops out of American Ash or Oak through to the highly affordable Gabbon or Birch Plywood. All our tops are finished with a two pot polyurethane to protect the surface from moisture and scratches, providing a smooth easy to clean surface that is perfect for indoor use.

We also offer an exterior grade finish to protect your tops from the elements.

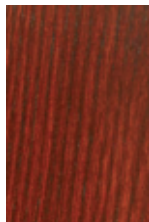

Our standard colour range gives you six distinct colour options with a clear finish to show off the wood's natural character. Finishes are satin as standard, with matte and gloss options also available, as well as the ability to colour match any colour sample.

## Platinum Electric

- Available in white and black finish
- Available in outputs of 2300W, 3400W and 4500W
- Available in standard (304SS) and marine (316SS) versions
- Can be wall mounted, ceiling mounted, suspended and recessed

## Tungsten Electric

- Available in 2000W, 3000W, 4000W and 6000W outputs
- Can be wall mounted, ceiling mounted and suspended
- Constructed from 304SS

## Eclipse Electric

- Available in a pendant and portable models
- Combines a 3000W heater and light
- Can be wall mounted or ceiling suspended

## Eclipse Portable

- Eye-catching dual heat and light freestanding unit
- Three heat output pre-sets up to 3000W
- Dimmable LED lighting rail
- Heat spread area of 11 m<sup>2</sup>
- Built-in dimmer controller & companion wireless remote

Our electric heaters can be used and comply with 6 star green rating for buildings

## Tungsten Portable

- Easy to maneuver
- Highly-efficient directional radiant heating
- Available in both Natural Gas and Propane (LPG)
- Heat output of 40 MJ
- Heat spread area up to 20 m<sup>2</sup>
- Award-winning design
