

The “GOOD, BETTER & BEST” of Glassware

In selecting glass for commercial use, consideration is given to material composition, the manufacturing process, design and shape. Specific production processes, including the addition of special ingredients, improved production techniques, and “tempering” will provide the glass with a commercial feature.

Our glass range is made up of Good, Better and Best standards.

GOOD

Soda-Lime glass is our basic no-frills offer, named after Sodium Carbonate (Soda), and Calcium Oxide (Lime) which are two of the principal materials added to Silica (molten sand) to produce this glass type.

BETTER

This glassware is toughened; mostly the whole glass, or sometimes just the most vulnerable areas: the rim and/or foot. This toughening process actually pre-stresses the glass, making it resistant to breakage or chipping caused by mechanical shock (crashing & bashing), or thermal shock (severe temperature change, e.g., when “hit” with hot water while cold, or filled with a cold drink when hot). It works by spreading the stress at the point of impact to the other tempered points of the glass to absorb the shock. However, tempered glass has a limited life—the glass is weakened every time it’s shocked. It has a memory, and over time the stress builds up to a point when it shatters—often in the dishwasher. To minimise loss by thermal shock, the best solution is to allow glasses to return to ambient temperature before they are next used or washed.

BEST

Our “Best” standard is the result of new glass technology designed to improve glass quality, such as Krysta from Arc. One such innovation is Crystal Glass, where specific metals (such as Barium and Potassium) are added to improve durability (resistance to stem twisting, rim chipping, mechanical and thermal shock), improve clarity and brilliance, provide total transparency, and resist dishwasher chemicals. By increasing the strength of the glass, the thickness of the side walls can also be reduced. And generally the rims of this quality glassware are “cold cut” to remove the rim bead to allow a free flow of the liquid onto the tongue.

Our Glassware is sourced from around the world

- **(GAR) Arc**—our Arc range extends from their “good” standard “Arcoroc” brand with typically thinner walls and shorter stature, to a “better” quality fully tempered range, to their Chef & Sommelier (C&S) brand of Krysta “premium” quality Crystalline glass which features increased shock resistance, ultra fine rim, and prolonged clarity after multiple washes.
- **(GB) Borgonovo**—an excellent commercial product range from Italy, competitively priced and designed to meet the requirements of the food service industry.
- **Essentials**—our own in-house brand. A package of competitively priced glass for the budget market.
- **(GL) Libbey**—Libbey glass features thicker walls, some with a tempered (toughened) rim and/or foot. An excellent food service product with a wide range of options in capacities suited to our market.
- **(GM) Lucaris**—our premium crystal glass offer from Ocean Glass in Thailand.
- **(GM) Crown, Ocean, Bormioli Rocco, Luigi Bormioli & Pasabahce**—internationally renowned glass brands designed for food service operators.
- **(GR) RCR**—our world’s best crystal glass from Italy. All products are made of Eco-crystal, a material of the highest quality and made with total respect to environment.

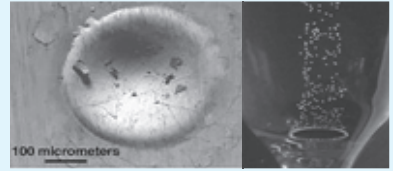

ARTIFICIAL NUCLEATION

In order to enhance effervescence in beer and sparkling wines, random bubble production is replaced with controlled creation of bubble streams.

A laser is used to etch the inside of the base of the glass, to provide nucleation sites.

The gasses in the liquid are trapped in the engraved microfibre gas pockets to produce bubble streams.

KEY FOR DIMENSIONS AND SYMBOLS

DIMENSIONS

TD = Top Diameter (mm) • H = Height (mm)

SYMBOLS

C&S Chef&Sommelier

Crystalline glass from Arc

- Increased shock resistance
- Ultra fine rim
- Greater shine and clarity after multiple washes

R only

Libbey safe edge rim chip replacement warranty.

R & F

Libbey safe edge rim and foot chip replacement warranty.

T

Toughened. Tempered glass strengthened by controlled thermal treatment.

Rim T

Rim tempered.

S

Stackable glass.

LE

Limited Edition.

Tempered glass from Arcoroc

- Up to 5 times more resilient than normal glasses. Reduces replacement costs, saving money.
- Superior resistance to thermal shock
- Dramatic resistance to mechanical shock
- Breaks into blunt fragments—not sharp shards—a valuable safety feature

SONHYX glass from Luigi Bormioli

- Lead-free blown crystal glass
- Fine rim and narrow stem, but with exceptional durability
- Perfectly transparent and with sonority
- Clarity and transparency maintained over 4000 industrial wash cycles

Eco-Crystal glass—All products are made of Eco-Crystal, a material of the highest quality and made with total respect for the environment. Factory has no need of a smokestack because production is emission free and uses renewable energy to create 100% recyclable products.

An exclusive and innovative technology to reinforce stem resistance against the most frequent causes of breakage such as washing, twisting and daily use. XLT is an invisible shield that protects the stem from abrasions, prolonging the useful life of stem even after many washing cycles.

Star Glass is an exclusive chemical composition that delivers ultra-clear and ultra-pure glass, completely recyclable because it is lead-free.

TRAZE

TRAZE Collection features a trio of cut crystal designs, available in double rock & hiball glasses, with three distinctive pattern designs under the theme **'Impressions between time'**.

The design concept is inspired by the tracings of time, representing styles of art symbolic of each era.

Italian Crystal Glass

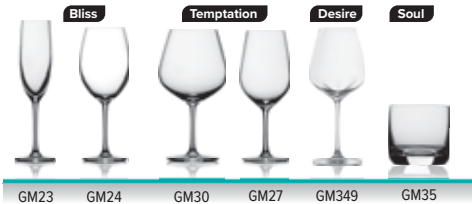

Superior in Quality and Purity ...

Bormioli Rocco Restaurant—superior crystalline lead-free glass goblets with a distinctive even height and modern diamond shape. The quality standard is determined by the unique material composition. Barium Carbonate combined with Potassium Oxide ensures absolute clarity and brilliance with superior strength and durability at a sensible price.

Bliss and Temptation Collections

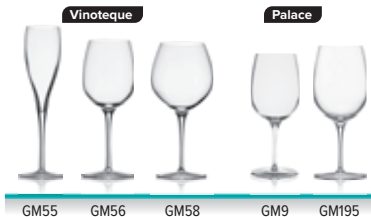

From Thailand, lead-free crystal glass with exceptional clarity and brilliance, combined with strength and durability. Inspired by modern dining lifestyles, Lucaris has created a new concept in beauty, functionality and quality that perfectly complements every dining and winning occasion. Shapes are wine specific with fine cut rims, perfect transparency and clarity, smooth and seamless where the stem joins the bowl, and a stable flat base for stability.

The best of Italy ... SONHYX

Luigi Bormioli is as elegant as fine crystal yet affordable priced and widely available. **SON.hyx glass**—with titanium reinforced stems. Incredible durability along with exceptional clarity, ensures maximum return on investment.

- Resistance to twisting, mechanical shock and rim chipping.
- Absolute transparency with high sonority index.

Bormioli Rocco InAlto

The Star Glass clarity and XLT strength, highest quality innovative technology from Bormioli Rocco, combined with a creative and distinctive design, provides excellence in performance. An ideal accompaniment to fine dining.

THE ART OF WINE TASTING.

InAlto Tre Sensi is the new top-of-the-line offer from Bormioli Rocco designed specifically for the most demanding restaurants and hotels.

Tre Sensi is a synonym of art, elegance and good taste.

An exclusive and innovative technology to reinforce stem resistance against the most frequent causes of breakage such as washing, twisting and daily use. XLT is an invisible shield that protects the stem from abrasions, prolonging the useful life of stem even after many washing cycles.

Star Glass is an exclusive chemical composition that delivers ultra-clear and ultra-pure glass, completely recyclable because it is lead-free.

RESTAURANT

Restaurant collection includes an articulated range of products designed to serve different types of drinks and wines, to enhance their taste, appearance and aroma characteristics.

The design of the products are classic with some distinctive notes, such as the marked angle of the cups that facilitates the wine service.

Enjoy maximum tasting pleasure, thanks to the presence of thin, laser cut rims.

Star Glass is an exclusive chemical composition that delivers ultra-clear and ultra-pure glass, completely recyclable because it is lead-free.

MADE IN ITALY

WHY CHOOSE RCR?

RCR is Italy's leading crystal manufacturer and one of the largest in the world. Its expertise in crystal production is a tradition that goes back over 40 years, making it an icon of Italian design in the world of home and tableware.

The company is located in Val d'Elsa in the heart of Tuscany. This industrial district has a high level of vertical integration allowing it to concentrate all production processes in house, from product design to engineering and construction of moulds, as well as marketing and distribution in Italy and 80 countries worldwide. All products are made of **Eco-Crystal**, a material of the highest quality and made with total respect for the environment. Their factory has no need of a smokestack because their production is emission free and uses renewable energy to create 100% recyclable products.

Choosing RCR Cristalleria Italiana and Eco-Crystal means counting on Made-in-Italy quality, knowing that you have done the right thing for your business and for the environment.
